

## **The SMART Induction Warmer uses as little as 100 watts!**

### **1AIW110V5**

The **SMART** Induction Warmer is the most economical warmer on the market today. This is the 110 volt model, but it is also available in a 230 volt model (1AIW230V5). It requires 69% less energy than our closest competitor. This model comes with a magnetic plate to convert a non-clad chafer to be used with the induction warmer. The magnets hold the warmer to the bottom of the chafer, allowing most traditional chafers to be converted to induction. The system has a symbiotic relationship between the warmer and our induction chafers. This combination only requires 200 watts/ 1.82 amps per chafer. This will allow you to run up to 10 chafing dishes on a single 20 amp circuit. Most of our competitors have a limit of two chafers per 20 amp circuit.

When converting from canned fuel to induction the largest expense is rewiring, not purchasing of the heaters. The building has to be rewired to accommodate the power required for most inductions. Our system eliminates the need to rewire 19 out of 20 times. By eliminating the costs associated with canned fuel, it will pay for all the new banquet equipment within 9 months in most cases.

**Going green made easy: When our induction warming system is combined with our chafers and urns, you only need 1.82 amps of power per chafer, soup or coffee urn. This makes our system the greenest in the world for heating your buffet, and enables you to run as many as ten induction warmers on a single 20 amp circuit. Having such a low power requirement will allow you to easily set up buffets in meeting rooms, or on the fly without fear of tripping breakers.**

**Induction for Dummies: Your staff turns it on and walks away.**

- **Adjustable automatic shut off controller**
- **Auto temperature control between 145° - 165°**
- **Auto timer for 1-9 hours (preset at 6 hours)**
- **No fire hazards**
- **Consistent temperatures**
- **Safe and secure**
- **Heats chafers, not the room**

#### **COMPATIBILITY:**

At 200 watts, the induction is most compatible with our chafers. It can be used with models 1A1231BRC, 1A1231CHC, 1A1234C, 1A1241BRC, 1A1241CHC, 1A1242BRC, 1A1242CHC, 1A1244C, 1A1434DA, 1A1444DA, 1A17510C & 1A17610C. It is also

compatible with most of our competitors chafers, **BUT** efficiency is greatly reduced. Competitors chafers may require as much as 600 watts/ 5.46 amps.

**Induction conversion kits are available for our roll top chafers.**

### Specifications

Carton quantity	1
Dimensions (L x W x H)	8.5" x 8.5" x 5"
Weight	5 lbs.

### Features

- Cost Effective — Convert from canned fuel to induction. The savings will pay for all your equipment!
- Detachable — Provides optional usage.
- Easy to use — Snaps to the bottom of chafer with magnets. No tools required.
- Efficient — Uses 66.29% less energy than most competitors. Holds temperature at 200 watts with Smart Chafers.
- Electric Heat — Holds an even, constant heat.
- Safe — No flames, no fumes, no smell.
- Timer — Heat continuously for 6 hours non-stop. Most competitors must be reset at 2 hours.
- Ventilation — Minimal requirements for ventilation.

### Available Accessories

<b>1A1231CH</b>	The Odin Oblong Roll Top Chafing Dish w/ Chrome Plated Legs
<b>1A1241CH</b>	The Large Odin Round Roll Top Chafing Dish w/ Chrome Plated Legs, Stainless Steel
<b>1A1434D</b>	The Odin Oblong Roll Top Drop-In Chafing Dish, Stainless Steel
<b>1A1444D</b>	The Large Odin Round Roll Top Drop-In Chafing Dish, Stainless Steel
<b>1A17510</b>	Ibis Oblong Roll Top Chafing Dish, Stainless Steel
<b>1A17610</b>	Ibis Round Roll Top Chafing Dish, Stainless Steel
