

**The 110V Omelet Cooker is a very Smart way to be Green & save green!**

**1AIC1414110V** ●

The Smart Omelet Induction cooker uses 1000 watts of power, 9.10 amps. It is designed so that two units can be used on a standard 110 volt, 20 amp circuit. This means you can set up an action station any place on the property. No need for special wiring. This makes the Smart Omelet Induction cooker the Greenest induction cooking system in the world.

Most Induction cookers require between 1800 and 2400 watts of power, limiting you to one cooker per 20 amp circuit.
